## Escape the "Stout" Class

An attractive figure is not a matter of size but of correct proportions. The stout women who are never spoken of as "stout" are those who give a little time and thought to proper corseting.

Rengo Belt Reducing Corsets give the wearer an appearance of slenderness. The exclusive Rengo Belt feature gives strength and support where the greatest strains fall—over the abdomen and hips. They have the reputation of being "the most economical reducing corsets ever devised."

Priced from \$2 to \$10

M. Lurie & Co.

## Chiropractic

When properly understood it is no longer a mystery and at once appeals to the intelligent man as a scientific method of healing the Sick.

It is a well known fact, admitted by all schools of healing, that the Nervous System is a unit. (The Brain, Spinal Cord, Cranial Nerves, Spinal Nerves, and the so-called sympathetic System) is that part of the Human Body thru which the life Principles operate during our physical existence. The nerves are the means whereby nerve stimulus is conveyed to every atom of tissue in the body. If there is no obstruction of the nerves to interfere with the proper distribution of the impulses or stimulus, it will reach its proper destination and normal function of all parts will be the result. This is HEALTH.

days of Lacy Stone, joggers, joggers, impulse to unsentimental speculation of women voters, leagues for making and let his mind dwell on the happy-virtue odious, and all the other hosts of militant Marys that have sprung up overnight, for the emancipation of women in general from nothing in particular—except dress—Polly—Andre says—perhaps it is well that we should turn aside for a moment from the contemplation of a woman boarding a streetcar, and ponder awhile on a few of the biological and sociological fundamentals that underlie our existing social organization, particularly as these have reference to the position that woman has occupied in society in the past, and the bearing of this evidence and the evidence of natural science on the position that she is rightfully qualified to assume in the future.

## Just Think of It!

Nearly a year ago, Eugene Lyman Flisk, director of the life extensions institute, while discussing in the Yale Review the possible titles of, indefinitely prolonging human life, gave way for a brief moment to the

## His Wife Intrudes

He takes this back in the next paragraph—his wife must have come upon him in the interim—but it is at least worth noting that the justification of woman's existence is becoming more and more tenuous, and may some day altogether disappear. It behooves the modern woman, therefore, to take heed lest she fall into

disfavor and be exterminated by the well-meaning but implacable members of the opposite sex. Think it over, girls!

Women serve no useful function in society by painting and powdering their faces, abbreviating their skirts, wearing diaphanous draperies, having their eyebrows extracted, staying away from home all day, cooking wretched meals, neglecting their children, and at all times seizing with avidity every opportunity that presents itself for loafing on the job.

If all the labor that men now devote to supporting female partners who are parasitic upon and burdensome to society could be given over to the production of socially useful goods and services, what a happy world this would be!

## Suppose You Were Sold

Woman should recognize that they occupy a mighty privileged position in modern society, compared with their former state. When one recalls that in the course of social evolution, from the most primitive

nomadic tribes to the modern industrial state, women have successively been bought and sold as an article of trade among tribes, been captured and carried off without protest where the system of exogamy prevailed, been surrendered as the spoils of war, been married off at an early age to one they have never met, been beaten, abused and subjected to the vilest treatment without hope of redress, one experience a mild surprise, to say the least, to see the modern woman carry on—asserting her rights and bemoaning her wrongs in the most strident and clamorous manner imaginable

## Back to Kitchens

So, girls, I say—repeat—think it over! Euthanasia may be all right for criminals and maddies, but it won't do for women. Women simply couldn't be euthanated. . . . But you girls must be careful. Stop writing letters to the Forum; buy fewer bon-bons and more cookbooks; leave the gay boulevards of the city streets; run to your houses, fall upon your knees, and—start scrubbing the kitchen floor.

## Frames Frames

Just received splendid assortment of photograph frames, square, ovals, right, swing, etc., latest styles right from factory which we will dispose of at upstairs prices. Also, frames made to your order; 125 styles moulding in stock.
